

WG-500R FLEX

WG-500R Flex is a glove with a single nitrile coating constructed around a 13-gauge nylon liner. The economical solution, that benefits from Wonder™ nitrile micro foam coating technology, brings an exceptional grip and comfort for tasks such as parts assembly and warehouse handling. The WG-500R Flex is an excellent choice for a general-purpose glove that performs well in wet, slightly oily and dry conditions.

KEY FEATURES

- ✓ Soft flexible liner offering suppleness and dexterity
- ✓ Excellent tactile sensitivity with superior comfort
- ✓ Anatomically engineered, reducing hand fatigue and increasing comfort
- ✓ Excellent grip performance for safe handling in dry-to-oily applications

TYPE OF PROTECTION

- General purpose

APPLICATIONS

- Aerospace
- Mechanical industry
- Assembly
- Automotive
- Warehousing-packing-and-logistics
- Mining industry
